

Registration is now open for the 2015 Registered Service Technician Trainings. This training will meet the requirements to renew/maintain your certification for an additional 3 years past the date of the training. Anyone who holds a current license as of July 1, 2014 has had their certification extended and will not expire until March 31 of 2017. However, we will be reducing the number of RST trainings we complete each year. It is in your best interest to attend the training closest to you even though your certification is not expired because we may not hold another training in your area for another three years.

To register for one of the trainings click on the REGISTER NOW link under to the desired training:
